

## Specialty pharmacy drug list

Effective January 1, 2017

BriovaRx<sup>®</sup>, the OptumRx<sup>®</sup> specialty pharmacy, provides comprehensive support services, including access to pharmacists around the clock, for high-cost oral and injectable medications used to treat rare and complex conditions. In addition, your medications will be shipped to you at no extra cost.

## Characteristics of specialty medications

“Specialty” medications are defined as high-cost oral or injectable medications used to treat rare and complex conditions. These are highly complex medications, typically biology-based, that structurally mimic compounds found within the body. Medications must have at least one of the following characteristics in order to be classified as a specialty medication by BrivoRx:

### High cost

- Typically priced at more than \$1,000 per 30-day supply.

### High complexity

- Biotechnology products<sup>†</sup>
- Medications that treat ultra rare conditions
- Medications that are included in a specialty therapeutic drug class strategy

### High-touch medications that require:

- Temperature control or other special handling and shipping requirements (e.g., refrigerated or frozen shipping)
- Ongoing management by a pharmacist and/or physician specializing in treating the condition
- Focused, in-depth education including how to administer injections, adhere to the treatment protocol, and manage side effects

<sup>†</sup> Protein or protein-based molecular entities
